Introduction

Product description

The product is a walk-behind rammer for compaction of granular soil, fine-grained soil and soil that has high contents of clay.

pipes or other small spaces. Examples of such work are house foundations and parking lots. Do not use the product for other tasks.

Intended use

The product is for professional operation only. The product is used for compaction in trenches, around

Product overview

- | | |
|----------------------------|-------------------------------|
| 1. Fuel tank | 8. Primer bulb |
| 2. Air filter latch | 9. Throttle control |
| 3. Hour meter | 10. Handle / Safety frame |
| 4. Vibration damping units | 11. Fuel filter |
| 5. Type plate | 12. Drain plug for engine oil |
| 6. Air filter indicator | 13. Oil tank / dipstick |
| 7. Choke control | 14. Rammer leg |

- 15. Rammer shoe
- 16. Sight glass for the oil in the spring-loaded rammer leg
- 17. Starter rope handle
- 18. Engine oil indicator
- 19. Operator's manual

Hour meter

When the engine is on, the hour meter shows the engine speed in rpm. When the engine is off, the hour meter shows the total operation time of the product in hours.

Throttle control

The throttle control has 3 available positions:

- Operation mode position (A)
- Start position / idle speed position (B)
- Stop position (C)

Symbols on the product

 Be careful and use the product correctly. This product can cause serious injury or death to the operator or others.

 Read the manual carefully and make sure that you understand the instructions before you use the product.

 Air filter indicator.

 Use hearing protection.

 Use protective boots.

 The spring can eject and cause injury.

 Hot surface.

 Lift the product at this position on the safety frame.

 Operation position.

 n/min
Start position / idle speed position.

 Engine stop position.

 Fuel: Unleaded gasoline with a maximum of 10% ethanol.

 Engine oil level.

 Primer bulb.

 Set throttle control in start position.

 Choke closed.

 x5
Push the primer bulb 5 times.

Pull the starter rope handle.

Choke open.

Let the engine operate at idle speed.

Noise emission to the environment label as per EU and UK directives and regulations, and New South Wales legislation Protection of the Environment Operations (Noise Control) Regulation 2017. The guaranteed sound power level of the product is specified in *Technical data on page 17* and on the label.

This product is in compliance with applicable EC directives.

Note: Other symbols/decals on the product refer to special certification requirements for some markets.

Type plate

1. Product type
2. Serial number with production date, year, week and sequence number
3. Rated power
4. Product weight
5. Brand
6. Manufacturer and manufacturer address
7. Product number
8. Production year

Product damage

We are not responsible for damages to our product if:

- the product is incorrectly repaired.
- the product is repaired with parts that are not from the manufacturer or not approved by the manufacturer.
- the product has an accessory that is not from the manufacturer or not approved by the manufacturer.
- the product is not repaired at an approved service center or by an approved authority.

Safety

Safety definitions

Warnings, cautions, and notes are used to point out particularly important parts of the manual.

WARNING: Used if there is a risk of injury or death for the operator or bystanders if the instructions in the manual are not obeyed.

CAUTION: Used if there is a risk of damage to the product, other materials or the adjacent area if the instructions in the manual are not obeyed.

Note: Used to give more information that is necessary in a given situation.

General safety instructions

WARNING: Read the warning instructions that follow before you use the product.

- This product is a dangerous tool if you are not careful or if you use the product incorrectly. This product can cause serious injury or death to the operator or others. Before you use the product,

you must read and understand the contents of this operator's manual.

- This product is not intended for use by persons (including children) with reduced physical, sensory or mental capabilities, or lack of experience and knowledge.
 - Save all warnings and instructions.
 - Comply with all applicable laws and regulations.
 - The operator and the employer of the operator must know and prevent the risks during operation of the product.
 - Do not let a person operate the product unless they read and understand the contents of the operator's manual.
 - Do not operate the product unless you receive training before use. Make sure that all operators receive training.
 - Do not let a child operate the product.
 - Only let approved persons operate the product.
 - The operator is responsible for accidents that occur to other persons or their property.
 - Do not use the product if you are tired, ill, or under the influence of alcohol, drugs or medicine.
 - Always be careful and use your common sense.
 - This product produces an electromagnetic field during operation. This field can under some circumstances interfere with active or passive medical implants. To decrease the risk of serious injury or death, we recommend persons with medical implants to speak to their physician and the medical implant manufacturer before operating this product.
 - Keep the product clean. Make sure that you can clearly read signs and decals.
 - Do not use the product if it is damaged.
 - Do not make modifications to this product.
 - Do not operate the product if it is possible that other persons have made modifications to the product.
- Make sure that there is no grease or oil on the handles, the safety frame and other surfaces on the product. Slippery surfaces can cause the product to fall and there is a risk of injury and damage to the product.
 - Do not use the product in areas where fire or explosions can occur.
 - The product can cause objects to eject at high speed. Make sure that all persons in the work area use approved personal protective equipment. Remove loose objects from the work area.
 - Before you go away from the product, stop the engine and make sure that there is no risk of accidental start.
 - Make sure that clothes, long hair and jewelry do not get caught in moving parts.
 - Do not hit the product.
 - Always operate the product from behind with your two hands on the handle. Do not touch the rammer shoe when the product is on.
 - Do not operate the product near electrical cables. The product does not have electrical insulation and injury or death can occur.
 - Before you operate the product, find out if there are hidden wires, cables and pipes in the work area. If the product hits a hidden object, stop the engine immediately and examine the product and the object. Do not start to operate the product again until you know that it is safe to continue.
 - Put the product in an upright position before you start it.
 - Do not sit on the product.
 - Keep your feet away from the rammer shoe.
 - Do not operate the product with your leg on the handle.
 - Do not operate the product on solid rock, hard concrete or other hard surfaces. There is a risk of injury and damage to the product.
 - Do not operate the product on a slope.
 - When you operate the product in a trench or other small space, make sure that the rammer shoe can move freely. If the space is too small for the rammer shoe, there is a risk of damage to the product. There is also a risk of injury from sudden movements in the product.
 - If the product falls on its side during operation, stop the engine before you lift the product to upright position.

Safety instructions for operation

WARNING: Read the warning instructions that follow before you use the product.

- Make sure that you know how to stop the engine quickly in an emergency.
- The operator must have the physical strength that is necessary to operate the product safely.
- Do not operate the product without all protective covers installed.
- Use personal protective equipment. Refer to *Personal protective equipment on page 7*.
- Make sure that only approved persons are in the work area.
- Keep the work area clean and bright.
- Make sure that you are in a safe and stable position during operation.

Vibration safety

WARNING: Read the warning instructions that follow before you use the product.

- During operation of the product, vibrations go from the product to the operator. Regular and frequent operation of the product can cause or increase the degree of injuries to the operator. Injuries can occur

in fingers, hands, wrists, arms, shoulders, and/or nerves and blood supply or other body parts. The injuries can be debilitating and/or permanent, and can increase gradually during weeks, months or years. Possible injuries include damage to the blood circulation system, the nervous system, joints, and other body structures.

- Symptoms can occur during operation of the product or at other times. If you have symptoms and continue to operate the product, the symptoms can increase or become permanent. If these or other symptoms occur, get medical aid:
 - Numbness, loss of feeling, tingling, pricking, pain, burning, throbbing, stiffness, clumsiness, loss of strength, changes in skin color or condition.
- Symptoms can increase in cold temperatures. Use warm clothing and keep your hands warm and dry when you operate the product in cold environments.
- Do maintenance on and operate the product as given in the operator's manual, to keep a correct vibration level.
- The product has a vibration damping system that decreases the vibrations from the handles to the operator. Let the product do the work. Do not push the product with force. Hold the product at the handles lightly, but make sure that you control the product and operate it safely. Do not push the handles into the end stops more than necessary.
- Keep your hands on the handle or handles only. Keep all other body parts away from the product.
- Stop the product immediately if strong vibrations suddenly occurs. Do not continue the operation before the cause of the increased vibrations is removed.

Dust safety

WARNING: Read the warning instructions that follow before you use the product.

- Operation of the product can cause dust in the air. Dust can cause serious injury and permanent health problems. Silica dust is regulated as harmful by several authorities. These are examples of such health problems:
 - The fatal lung diseases chronic bronchitis, silicosis and pulmonary fibrosis
 - Cancer
 - Birth defects
 - Skin inflammation
- Use correct equipment to decrease the quantity of dust and fumes in the air and to decrease dust on work equipment, surfaces, clothing and body parts. Examples of controls are dust collection systems and water sprays to bind dust. Decrease dust at the source where possible. Make sure that the

equipment is correctly installed and used and that regular maintenance is done.

- Use approved respiratory protection. Make sure that the respiratory protection is applicable for the dangerous materials in the work area.
- Make sure that the airflow is sufficient in the work area.
- If it is possible, point the exhaust of the product where it cannot cause dust to go into the air.

Exhaust fumes safety

WARNING: Read the warning instructions that follow before you use the product.

- The exhaust fumes from the engine contain carbon monoxide which is an odourless, poisonous and very dangerous gas. To breathe carbon monoxide can cause death. Because carbon monoxide is odourless and cannot be seen, it is not possible to sense it. A symptom of carbon monoxide poisoning is dizziness, but it is possible that a person becomes unconscious without warning if the quantity or concentration of carbon monoxide is sufficient.
- Exhaust fumes also contain unburned hydrocarbons including benzene. Long-term inhalation can cause health problems.
- Exhaust fumes that you can see or smell also contain carbon monoxide.
- Do not use a combustion engine product indoors or in areas that do not have sufficient airflow.
- Do not breathe the exhaust fumes.
- Make sure that the airflow in the work area is sufficient. This is very important when you operate the product in trenches or other small work areas where exhaust fumes can easily collect.

Noise safety

WARNING: Read the warning instructions that follow before you use the product.

- High noise levels and long-term exposure to noise can cause noise-induced hearing loss.
- To keep the noise level to a minimum, do maintenance on and operate the product as given in the operator's manual.
- Examine the muffler for damages. Make sure that the muffler is correctly attached to the product.
- Use approved hearing protection while you operate the product.
- Listen for warning signals and voices when you use hearing protection. Remove the hearing protection when the product is stopped, unless hearing protection is necessary for the noise level in the work area.

Personal protective equipment

WARNING: Read the warning instructions that follow before you use the product.

- Always use approved personal protective equipment when you operate the product. Personal protective equipment cannot fully prevent injury but it decreases the degree of injury if an accident does occur. Let your dealer help you select the correct personal protective equipment.
- Regularly do a check of the condition of the personal protective equipment.
- Use an approved protective helmet.
- Use approved hearing protection.
- Use approved respiratory protection.
- Use approved eye protection with side protection.
- Use protective gloves.
- Use boots with steel toe-cap and non-slip sole.
- Use approved work clothing or equivalent close-fitting clothing that has long sleeves and long legs.

Fire extinguisher

- Keep a fire extinguisher near during operation.
- Use a powder fire extinguisher of "ABE" class or a carbon dioxide fire extinguisher of "BE" type.

Safety devices on the product

WARNING: Read the warning instructions that follow before you use the product.

- Do not use a product with safety devices that are damaged or do not operate correctly.
- Do a check of the safety devices regularly. If the safety devices are damaged or do not operate correctly, speak to your Husqvarna servicing dealer.
- Do not make modifications to safety devices.

Muffler

The muffler keeps the noise levels to a minimum and sends the exhaust fumes away from the operator.

Do not use the product if the muffler is missing or damaged. A damaged muffler increases the noise level and the risk of fire.

WARNING: The muffler becomes very hot during and after use and when the engine operates at idle speed. Be careful near flammable materials and/or fumes to prevent fire.

To do a check of the muffler

- Examine the muffler regularly to make sure that it is attached correctly and not damaged.

Safety frame

The safety frame prevents damage to the product if it falls. The handle and the lifting point are parts of the safety frame.

To do a check of the safety frame

- Make sure that there are no cracks or other damages on the safety frame.
- Make sure that the safety frame is correctly installed on the product.

Vibration damping units

The vibration damping units decrease vibration in the product. The vibration damping units decrease harmful vibrations to prevent injury to the operator and damage to the product.

To do a check of the vibration damping system

1. Make sure that there are no cracks or deformation on the vibration damping units.
2. Make sure that the vibration damping units are correctly attached to the engine unit and handle unit.

Refer to *Product overview on page 2* for information about where the vibration damping system is on your product.

To do a check of the stop function

1. Start the product. Refer to *To start the product on page 9*.
2. Set the throttle control in the stop position.

3. If the engine does not stop, let an approved service center do servicing on the product.

Fuel safety

WARNING: Read the warning instructions that follow before you use the product.

Safety instructions for maintenance

WARNING: Read the warning instructions that follow before you use the product.

- Fuel is flammable and the vapors are explosive. Be careful with fuel to prevent injury, fire and explosion.
 - Do not breathe in the fuel vapors. The fuel vapors are poisonous and can cause injury. Make sure that the airflow is sufficient.
 - Do not remove the fuel tank cap or fill the fuel tank when the engine is on.
 - Make sure that the engine is cool before you refuel.
 - Do not fill fuel in an indoor area or in a closed space. Insufficient airflow can cause injury or death because of asphyxiation or carbon monoxide poisoning.
 - Do not smoke near the fuel or the engine. Extinguish all cigarettes, cigars, pipes and other sources of ignition.
 - Do not put hot objects near the fuel or the engine.
 - Do not fill fuel near sparks or flames.
 - Before you refuel, open the fuel tank cap slowly and release the pressure carefully.
 - Fuel on your skin can cause injury. If you get fuel on your skin, use soap and water to remove the fuel.
 - If you spill fuel on your clothing, change clothing immediately.
 - Do not fill the fuel tank fully. Heat causes the fuel to expand. Keep a space at the top of the fuel tank.
 - Tighten the fuel tank cap fully. If the fuel tank cap is not tightened, there is a risk of fire.
 - Before you start the product, move the product to a minimum of 3 m/10 ft from where you refueled.
 - Do not start the product if there is fuel or engine oil on the product. Remove the unwanted fuel and engine oil. Let the product dry and wait until fuel vapors are gone before you start the engine.
 - Examine the engine for leaks regularly. If there are leaks in the fuel system, do not start the engine until the leaks are repaired.
 - Do not use your fingers to examine the engine for leaks.
 - Keep fuel in approved containers only.
 - When the product and fuel is in storage, make sure that fuel and fuel vapors cannot cause damage.
 - Drain the fuel in an approved container outdoors and away from sparks and flames.
- If the maintenance is not done correctly and regularly, the risk of injury and damage to the product increases.
 - Use personal protective equipment. Refer to *Personal protective equipment on page 7*.
 - Stop the engine and make sure that all parts of the product are cool before you do the maintenance.
 - Clean the product to remove dangerous material before you do the maintenance.
 - Disconnect the spark plug cap before you do the maintenance.
 - The exhaust fumes from the engine are hot and can contain sparks. Do not operate the product in indoor areas or near flammable material.
 - Do not change the product. Modifications that are not approved by the manufacturer, can cause serious injury or death.
 - Always use original accessories and spare parts. Accessories and spare parts that are not approved by the manufacturer, can cause serious injury or death.
 - Replace damaged, worn or broken parts.
 - Only do the maintenance as given in this operator's manual. Let an approved service center do all other servicing.
 - Remove all tools from the product before you start the engine after maintenance. Loose tools or tools attached to rotating parts can eject and cause injury.
 - After maintenance, do a check of the vibration level in the product. If it is not correct, speak to an approved service center.
 - Let an approved service center do servicing on the product regularly.

Operation

Introduction

WARNING: Read and understand the safety chapter before you use the product.

- Do the daily maintenance. Refer to *Maintenance schedule on page 10*.

To do before you operate the product

- Read the operator's manual carefully and make sure that you understand the instructions.
- Read the engine manual that is supplied by the engine manufacturer.

- Make sure that the rubber latch of the air filter cover is correctly attached and not damaged.

4. Pull the starter rope handle slowly until you feel resistance.

To start the product

1. Set the throttle control in the start position.

2. If the engine is cold, push the primer bulb 5 times.

3. Set the choke control in the correct position.
 - a) If the engine is cold, close the choke.
 - b) If the engine is warm or the ambient temperature is high, open the choke.

5. Release the starter rope handle to let the starter rope go back.
6. Pull the starter rope handle until the engine starts.
7. Open the choke control gradually until it is fully open.

8. Let the engine operate at idle speed for 2–3 minutes before you apply full throttle.

To operate the product

1. Set the throttle control in the operation position.

2. Hold the handle and move the product in the necessary direction.

CAUTION: Do not push the product down. Too much pressure can cause unsatisfactory result.

3. Make sure that the rammer shoe is parallel to the ground during the operation.

To stop the product

- Set the throttle control in the stop position.

Maintenance

Introduction

WARNING: Read and understand the safety chapter before you do maintenance on the product.

Maintenance schedule

* = General maintenance done by the operator. The instructions are not given in this operator's manual.

X = The instructions are given in this operator's manual.

O = Refer to the engine manual for instructions.

General product maintenance	Before use, each 10 h	After the first 20 h	Weekly, each 100 h	Yearly, each 500 h
Make sure that there are no fuel or oil leaks.	*			
Clean the product.	X			
Make sure that nuts and screws are tightened.	*			
Examine the throttle control and choke control for damage.	*			
Make sure that the throttle control and the choke control can move smoothly.	*			
Do a check of the oil level in the rammer leg.	X			
Replace the oil in the rammer leg.		X		X
Tighten the bolts on the rammer shoe.		X		
Examine the vibration damping units for damage.			X	X
Examine the air filter cover rubber latch for wear and damage.				X

Engine maintenance	Before use, each 10 h	After the first 20 h	Weekly, each 100 h	Yearly, each 300 h
Do a check of the fuel level and the engine oil level.	X			

Engine maintenance	Before use, each 10 h	After the first 20 h	Weekly, each 100 h	Yearly, each 300 h
Do a check of the air filter indicator. Clean or replace the air filter.	X			X
Clean the cooling fins of the engine.	O			
Replace the engine oil.		X	X	X
Replace the air filter.		X	X	X
Do a check of the engine speed.		O	O	O
Examine and clean the spark plug. Replace the spark plug if it is necessary.			O	O
Clean the spark arrester screen on the muffler.			O	O
Adjust the valve head clearance for the air intake and the exhaust valves.				O
Drain the fuel and clean the fuel tank and the fuel filter.				O
Drain water from the fuel system.				O
Replace the fuel filter.				O

To clean the product

CAUTION: Before you clean the product, attach a plastic bag tightly around the fuel tank cap. This is to make sure that water does not go into the venthole in the fuel tank cap.

- Use running water from a hose or a high-pressure washer to clean the product.

CAUTION: Do not point the water directly at the fuel tank cap, electrical components or the engine.

- Remove grease and oil from the handle.

To do a general inspection

- Make sure that all nuts and screws on the product are tightened correctly.

To do a check of the engine oil level

1. Put the product in an upright position.
2. Remove the oil tank cap and dipstick.

3. Clean the oil from the dipstick.

4. Put the dipstick back fully into the oil tank.
5. Remove the dipstick.
6. Examine the oil level on the dipstick.
7. If the oil level is low, fill with engine oil and do a check of the oil level again. Refer to *Technical data* on page 17 for the correct type of oil.

To replace the engine oil

If the engine is cold, start the engine for 1–2 minutes before you drain the engine oil. This makes the engine oil warm and easier to drain.

WARNING: Engine oil is very hot directly after the engine stops. Let the engine become cool before you drain the engine oil. If you spill engine oil on your skin, clean with soap and water.

1. Put a container below the drain plug for the engine oil.
2. Remove the oil drain plug.

3. Tilt the product and let the oil run out into the container.

4. Install the oil drain plug and tighten it.
5. Fill with new engine oil. Refer to *Technical data on page 17* for the correct type of oil.
6. Do a check of the engine oil level.

To replace the oil in the rammer leg

1. Put a container below the oil drain plug.
2. Remove the oil drain plug.

3. Let the oil run out into the container.
4. Install the oil drain plug and tighten it. Make sure that the sealing washer is not damaged.

5. Remove the sight glass.

6. Fill with new oil through the hole for the sight glass. Refer to *Technical data on page 17* for the correct type of oil.
7. Install the sight glass and tighten it fully.
8. Do a check of the oil level.

To do a check of the oil level in the rammer leg

1. Put the product in upright position.
2. Look at the sight glass (A). The oil level is correct when it is at the middle of the sight glass.

To tighten the bolts on the rammer shoe

- Tighten the 13 bolts on the rammer shoe with a wrench.

To clean or replace the air filter

WARNING: Use approved respiratory protection when you clean or replace the air filter. Discard used air filters correctly. The dust in the air filter is dangerous to your health.

WARNING: Do not clean the air filter with compressed air. This causes damage to the air filter and the risk increases that you breathe the dangerous dust.

1. Examine the air filter indicator. If the air filter indicator is on red, it is necessary to replace the air filter.

2. Lift the rubber latch carefully and pull it away from the air filter cover. Fold the air filter cover forward.

3. Remove the air filter from the air filter housing.

4. Clean the air filter housing with a brush.
5. Tap the air filter against a hard surface or use a vacuum cleaner to remove the particles.

CAUTION: Do not let the nozzle of the vacuum cleaner touch the surface of the paper filter element. Keep a small distance. The sensitive surface of the paper filter element becomes damaged if objects touch it.

6. Examine the air filter for damage.
7. Discard the air filter if it is damaged.

CAUTION: Always replace a damaged air filter, or the dust will go into the engine and cause engine damage.

8. Put the clean air filter or a new air filter into the air filter housing.
9. Push the reset button for the air filter indicator.

10. Fold the air filter cover down and put the rubber latch back to the locked position of the air filter cover.

Note: Make sure that the rubber latch of the air filter cover is correctly attached.

Transportation, storage and disposal

Transportation

WARNING: Be careful during transportation. The product is heavy and can cause injury or damage if it falls or moves during transportation.

Transport wheels let you move the product manually for shorter distances. For longer distances, lift the product to move it or put the product on a vehicle.

CAUTION: Do not tow the product behind a vehicle.

To move the product on the transport wheels

1. Set the throttle control in the stop position.

2. Tilt the product forward until the wheels on the handle are on the ground.
3. Lift the product at the lift handle and move it forward and rearward on the wheels.

To install and remove the transport device (LT 5005)

1. Set the throttle control in the stop position.
2. Lift the handle to tilt the product away from you.
3. Use your foot to put the transport device between the rammer shoe and the lift handle on the rammer leg.

4. Push the handle down to tilt the product rearward.

5. Remove the transport device in the opposite sequence.

WARNING: Do not use your hands to install or remove the transport device. Push it in and pull it away from the product with your foot.

To lift the product

WARNING: Make sure that the lifting equipment has the correct specification to lift the product safely. The type plate on the product shows the product weight.

WARNING: Do not walk or stay below or near a lifted product.

- Attach the lifting equipment at the lifting point of the safety frame. A label on the product identifies the correct position.

WARNING: Do not use metal hooks, chains or other lifting equipment with rough edges that can cause damage to the lifting eye.

WARNING: Do not lift a damaged product. Make sure that the safety frame and the vibration damping units are correctly installed and not damaged.

To safety the product to a transportation vehicle with tie-down straps

1. Set the throttle control in the stop position.

2. Tilt the product forward until the wheels on the handle are on the ground.
3. Attach a strap to the lifting eye and to the vehicle.
4. Attach a strap to the lift handle and to the vehicle.

Storage

- Remove all fuel from the fuel tank before you put the product in storage for a long period of time. Discard the fuel at an applicable disposal location.
- Clean the product before storage. Remove clay and sand from the rammer shoe. Remove oil and dust from the rubber parts.
- Apply a thin layer of oil on the rammer shoe to prevent corrosion.
- Clean the air filter before storage.

- Carefully pull the starter rope handle until there is a small resistance.
- Put a protective cover on the product.
- Keep the product in a dry and frost free area.
- Keep the product in a locked area to prevent access for children or persons that are not approved.

Disposal

- Obey the local recycling requirements and applicable regulations.
- Discard all chemicals, such as engine oil or fuel, at a service center or at an applicable disposal location.
- When the product is no longer in use, send it to a Husqvarna dealer or discard it at a recycling location.

Noise and vibration emissions	LT 5005	LT 6005
Sound power level, measured dB (A)	104	104

¹ As specified by the engine manufacturer. The power rating of the engine indicated is the average net output (at specified rpm) of a typical production engine for the engine model measured to SAE standard J1349/ISO1585. Mass production engines may differ from this value. Actual power output for the engine installed on the final product will depend on the operating speed, environmental conditions and other values.

² This CO2 measurement results from testing over a fixed test cycle under laboratory conditions a(n) (parent) engine representative of the engine type (engine family) and shall not imply or express any guarantee of the performance of a particular engine.

Noise and vibration emissions	LT 5005	LT 6005

Sound pressure level at the operator's ear, L_P , dB (A) ⁴	92	92
Vibration level, a_{hv} , m/s^2 ⁵	6.4	6.4

Noise and vibration declaration statement

These declared values were obtained by laboratory type testing in accordance with the stated directive or standards and are suitable for comparison with the declared values of other products tested in accordance with the same directive or standards. These declared values can be used for preliminary risk assessments but values measured in individual work places may be higher. The actual exposure values and risk of harm experienced by an individual user are unique and depend upon the way the user works, in what material the product is used, as well as upon the exposure time and the physical condition of the user, and the condition of the product.

³ Noise emissions in the environment measured as sound power (L_{WA}) as per EN ISO 3744 in conformity with EC directive 2000/14/EC. The difference between guaranteed and measured sound power is that the guaranteed sound power also includes dispersion in the measurement result and the variations between different machines of the same model according to Directive 2000/14/EC.

⁴ Sound pressure level L_P according to EN ISO 11201, EN 500-4. Uncertainty K_{PA} 3.5 dB (A).

⁵ Vibration value according to EN 500-4. Reported data for vibration level has a typical statistical dispersion (standard deviation) of $1.5 m/s^2$.

Product dimensions LT 5005

A	Rammer shoe contact area, m ² /sq. ft.	0.034/0.36 / 0.053/0.57	E	Height, mm/in.	1030/40.6
B	Rammer shoe length, mm/in.	330/13	F	Rammer shoe width, mm/in.	153/6 / 230/9
C	Length, mm/in.	726/28.6	G	Width, mm/in.	345/13.6
D	Handle height, mm/in.	910/35.8			

Product dimensions LT 6005

A	Rammer shoe contact area, m ² /sq. ft.	0.053/0.57 / 0.065/0.70	E	Height, mm/in.	1084/42.7
B	Rammer shoe length, mm/in.	330/13	F	Rammer shoe width, mm/in.	230/9 / 280/11
C	Length, mm/in.	726/28.6	G	Width, mm/in.	345/13.6
D	Handle height, mm/in.	935/36.8			

Declaration of Conformity

EC Declaration of Conformity

We, **Husqvarna AB**, SE-561 82 Huskvarna, Sweden, tel: +46-36-146500, declare on our sole responsibility that the product:

Description	Rammer Compaction Machine
Brand	Husqvarna
Type/Model	LT 5005, LT 6005
Identification	Serial numbers dating from 2021 and onwards

complies fully with the following EU directives and regulations:

Directive/Regulation	Description
2006/42/EC	"relating to machinery"
2014/30/EU	"relating to electromagnetic compatibility"
2000/14/EC	"relating to outdoor noise"

and that the following harmonized standards and/or technical specifications are applied;

EN ISO 12100:210, EN 500-1:2006+A1:2009, EN 500-4:2011

Notified Body: 0404, SMP Svensk Maskinprovning AB, Box 4053, SE-904 03 Umeå, Sweden has issued reports regarding the assessment of conformity according to annex VI of the COUNCIL'S DIRECTIVE of May 8, 2000 "relating to the noise emissions in the environment" 2000/14/EC

For information relating to noise emissions, refer to the chapter *Technical data on page 17*.
